**AT A GLANCE**

**Sheppard and media back together**

By Fred McGunagle

Sheppard and media back together

The words “Sam Sheppard” and “mute media” were to be forever linked.

So when attorney Terry Giblin invited the media to a press conference in March, it was a moment the Cleveland media had been waiting for. It was a moment to rekindle old emotions.

Sheppard presented results of DNA analysis of blood samples from the brutal 1964 murder of Marilyn Sheppard. They went beyond the tests carried out in 1964.

Giblin reported that results of DNA analysis of blood samples from the brutal 1964 murder of Marilyn Sheppard. They went beyond the tests carried out in 1964.

Giblin then gave an account of Sheppard’s early life. Sheppard was a scientist who had made significant contributions to the fields of biochemistry and molecular biology.

Giblin also mentioned Sheppard’s marriage to Marilyn and their children.

Giblin then turned to the events surrounding the murder of Marilyn and how Sheppard was involved.

Finally, Giblin said that Sheppard had been wrongfully imprisoned and that the new DNA evidence would exonerate him.

Giblin then thanked everyone who had supported Sheppard and said that they would continue to fight for justice.

**Further Century 1998**

A book of ‘Our Century’

Today marks the second-last week of ‘Our Century’. Early next year we will be offering readers the opportunity to obtain a compendium of these pages. Look for more information in The Plain Dealer in mid-January.

John Glenn returns to space at age 77
